# Matterport for Insurance Carriers

Discover Matterport's digital twin technology—the comprehensive way to streamline your property claims-handling processes by helping your teams save time, cut costs, and process claims faster.

The Matterport Advantage

Digital twins provide accurate, easy-to-use documentation that can serve as a single source of truth, enabling faster claims processing, remote inspections, and more precise payouts.
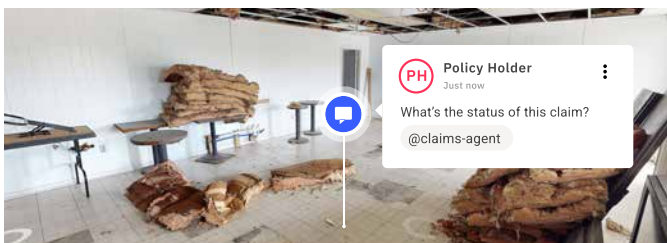

Mitigate

Minimize claims disputes, fraud, and abuse by leveraging comprehensive Matterport digital twins for all property loss documentation. Regardless if the loss was captured by your adjuster, service provider, or restoration contractor, your documentation would be thorough, irrefutable, and court-admissible.

Inspect

Reduce travel time and costs with remote inspections for underwriting, claims, and re-inspection processes. Matterport enables risk engineers and insurance adjusters to revisit and inspect any site repeatedly. For re-inspection requests, quick navigation of loss sites can increase efficiency in determining which losses truly require physical re-inspection, if any at all!

Collaborate

Password-protected links can be shared to facilitate collaboration and communication with a wide array of stakeholders involved in underwriting policies or claims processes. Trade in reviewing hundreds of 2D photographs and manual measurements for 3D documentation—easily shareable, cost-effective, comprehensive, and accurate.
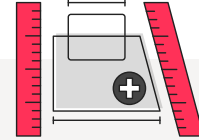

Experience

Increase policyholder satisfaction by improving the accuracy of payouts and significantly decreasing claims cycle times. In moments when catastrophic (CAT) event response is required, leverage Matterport Capture Services™ to help your customers return to their homes sooner and get their businesses up and running faster.

Matterport®

Reduce cycle times by more than 26 percent.

Decrease in-person reinspections by 86 percent.

Confirm measurements and discrepancies with 99 percent accuracy.

With Matterport, there is no longer a need for hundreds of photographs, manual measurements, and repeat site visits. Insure with the most comprehensive pre-loss asset documentation and manage risk, allowing for more informed and accurate underwriting practices. When losses occur, process claims with thorough documentation to reduce discrepancies and time spent resolving issues.

	Smartphone Capture + Axis Motor Mount	3rd Party 360 Cameras	Pro2 Camera	Pro3 Camera
Overview	Ideal for small spaces and for organizations with distributed locations. • Easy, affordable DIY tool. • Works for iPhone & Android phones.	Ideal for small and medium spaces. • Semi-pro cameras. • Portable and lightweight.	Ideal for most indoor spaces and limited outdoor spaces. • Professional 3D camera. • Ultra-high resolution.	Ideal for large, indoor and outdoor spaces. • Our newest, fastest lidar camera. • Extended range of 20m.
